

## **Packet Digital LLC Announces New Member of Board of Directors**

Fargo, North Dakota, 02/08/05

Packet Digital today announced the appointment of Dr. Richard Eden to the company's Board of Directors. Dr. Eden brings a wealth of industry expertise and experience to Packet Digital. He was a Distinguished Engineer at Rockwell, where he was the first to succeed in large-scale integration on gallium arsenide semiconductors. Shortly after leaving Rockwell, Dr. Eden founded Gigabit Logic, which later merged into TriQuint Semiconductor (TQNT), where he developed much of the technology that went into the world's fastest supercomputers.

CEO Joel Jorgenson commented, "The appointment of Dr. Eden to our Board of Directors is a great addition. His knowledge and experience in the semiconductor industry will assist in the leadership in Packet Digital as we continue to develop intellectual property in power management, packaging and systems development. Furthermore, Dr. Eden's experience in military systems and electronics will lead Packet Digital into new markets and towards new partnerships."

### **About Packet Digital LLC**

Packet Digital LLC is an innovator in the design and development of advanced power management, smart radio frequency identification (RFID), and wireless solutions. We focus on utilizing our intellectual property to create solutions that match specific customer needs.
